

128X PRODUCT OVERVIEW (Yak-Power Equipped)

The 128X from ASCEND® is designed with a catamaran-style hull which provides abundant space and unprecedented stability. A non-skid deck mat allows comfortable standing, while a lightweight, removable, powder coated aluminum high-back seating system maximizes comfort and fishability using ballistic nylon mesh and a breathable 3D soft poly mesh when you want to sit and relax. On-deck, the 128X sports an open design with 2 dedicated upright rod holders and in-gunnel lay-down rod storage,

Custom Catamaran Hull: Designed to deliver maximum stability in almost any type of water. The Catamaran Hull provided excellent primary and secondary stability whether you choose paddling, or stern mount electric propulsion!

High Back Seating System: Improved freedom of movement, NEW ergonomic design eliminates shoulder blade pinch and reduces pressure points. 600D ripstop polyester with increased UV resistance and durability. Adjustable nylon webbing strap. Intetrated Ballistic Nylon Monofilament mesh and 3D soft Poly Mesh for breathability and comfort in wed conditions. Fore and Aft and High low pre-set adjustments

Pre-Wired for 12-volt Electronic Accessories: A Yak Power wiring harness with circuit protection and master controller is pre-installed to power 12V electronics (not to exceed 15 amps), **will not support trolling motors**. Power ports are located in 2 locations for convenient connections. Waterproof master controller is pre-terminated to accept 3 additional auxiliary connections. See page 28 for further details.

Stern Motor or Power Pole Ready: The stern is equipped with industry standard 4 hole bolt pattern that allows the Torqueedo™ Stern Motor or Mini Power Pole to be mounted.

Custom Molded Mid Ship Dry Storage Access Hatch: Provides below deck dry storage for 3600-series tackle trays, electronics batteries, etc. A below-seat storage tray, along with in-gunnel catch all trays, allow storage options for almost all fishing environments

plus multiple molded receivers for 3600-series tackle boxes. A 12 Volt Yak-Power system with integrated electrical harness for plug-n-play installation of your fishing accessories, comes with 2 pre-installed ports, along with 1 auxiliary ports that you can install for additional 12V accessories. Four 16" accessory rail mounts along with landings located mid-ship allow the use of aftermarket accessories.

Adjustable Foot Braces: Allows a comfortable fit for almost anyone. This Kayak was designed to easily convert to a cable foot steering option if a stern motor is added.

Accessory Rails: 4 recessed accessory rails pre-installed to allow you to quickly add virtually any aftermarket accessory.

Paddle / Rod Holders: Port and starboard molded pockets allow paddle or rod positioning for multiple rods. Dual flush mount rod tubes also included.

Performance Grip and Side Load Assist Handles: Molded-over Nylon Strap bow handle and Mold in Stern Handles, make it easy to maneuver the 128X on land. Two mid kayak load assist side handles also aid in loading and unload from truck or trailer.

Sacrificial Skid Pads: We added Sacrificial Skid Pads to the bow and stern so if you have to drag the kayak the skid pads suffer the wear and can be replaced instead of damaging the hull.

Scupper Drains: Eight, 1.5 " (3.8 cm) self-draining molded thru-hull scuppers also included for deck drainage. In addition, a threaded, sealed drain plug allows you to easily drain excess water from the boat cavity.

Kayak Anatomy

128X SIT-ON-TOP KAYAK

128X model shown w/all accessories. Models and accessories will vary.

- Length: 12' 8" (3.86 m)
